Inspection

Type: ROUTINE INSPECTION

Date: FEB-05-2004

2.3

DEMONSTRATION OF COMPLIANCE WITH STANDARDS AND REGULATIONS.

Each applicant must make his or her animals, premises, facilities, vehicles, equipment, other premises, and records available for inspection during business hours and at other times mutually agreeable to the applicant and APHIS, to ascertain the applicant's compliance with the standards and regulations.

There was no record for the disposition of the Zebra. The primary contact person for this licensee was out of town today, but another backup designated contact person performed the inspection. All required records were located and reviewed, expect for the disposition of the Zebra. Records of all acquisitions & dispositions shall be made readily available to any APHIS inspector.

Correct by February 6, 2004

2.40

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Each exhibitor shall establish and maintain programs of adequate veterinary care that include the use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries.

The two llamas have overgrown hooves. Persia's hooves are longer than Rio's. Persia's front hooves are deviated laterally, & the rear ones are deviated medially. Rio's rear hooves are also deviated medially. There is a small $\frac{1}{4}$ " callus on the nose bridge of Rio, which is directly underneath the halter.

Humphrey (a camel) has a discharge from the left eye. The discharge is largely serous with a slight mucoid component. There are several flies that are also attracted to the orbit area, causing discomfort to this animal.

Have you veterinarian evaluate the above conditions and treat according.

The facility must be constructed of ~~wood~~ material and of such strength as appropriate ~~for~~ the animals involved. The outdoor housing facilities shall be structural sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

There are several holes in the wood stall used to house the llamas. The wood in this stall has started to deteriorate in several areas, leaving holes & splintering which could possibly injure these animals.

Repair or replace as necessary.

Correct by February 21, 2004.

3.127 (a)

FACILITIES, OUTDOOR.

When sunlight is likely to cause overheating or discomfort of the animals, sufficient shade by natural or artificial means shall be provided to allow all animals kept outdoors to protect themselves from direct sunlight.

The camels are put outside during the day (except for inclement weather). There is no shelter/shade structure(s) inside the pen. There may be some shade provided by nearby trees located outside the western portion of the pen. These trees might provide some shade during the latter part of the day but would not provide any during the mornings and noondays.

Additional shelter from the sun needs to be provided for these times.

Correct by February 21, 2004.

Current inventory: 2 elephants "Tina & Jewel", 2 llamas, 2 camels.

Note: The animal transport vehicles were undergoing routine winter quarters maintenance and were not inspected today.
